

New widescale distribution agreement in Bahrain and first order signed

Paris, April 7, 2016

VISIOMED GROUP (FR0011067669 – ALVMG), a company specializing in next-generation medical electronics, announces the opening of distribution of its products in Bahrain, with an agreement with the powerful Nasser Pharmacy Group. The first order has already been registered.

Nasser Pharmacy is a subsidiary of the Remza Investment Group, one of Bahrain's largest conglomerates dealing with real estate, health, catering, commerce and fashion in the Gulf country. Nasser Pharmacy is both an important network of dispensaries throughout the country and one of the main wholesalers of health products for the professional world (doctors and hospitals).

The agreement affects all products in the VISIOMED® line, including ThermoFlash®, and the entire BewellConnect® range of connected health objects and services. The first order is for a set of connected medical devices in addition to MyHealthBox®, the first connected home monitoring system for outpatient surgery patients, namely including MyECG®, the first wireless, connected, smart pocket electrocardiogram awarded at the latest CES in Las Vegas.

This agreement naturally rounds off the commercial presence of VISIOMED GROUP in the Middle East, after the recent agreement signed in Kuwait (ALGHANIM & SONS W.L.L.) and in Saudi Arabia (QETAF). With this agreement, VISIOMED products and the BewellConnect® offer are now being distributed in nearly 50 countries all over the world.

About VISIOMED GROUP

Founded in 2007 by Eric Sebban, VISIOMED GROUP is a company specializing in next-generation medical electronics. The laboratory develops and commercializes innovative health products in high-potential fields of medical self-diagnosis and wellness. VISIOMED is known for being the inventor of the ThermoFlash®, the first clinical infrared non-contact thermometer.

VISIOMED products incorporate innovation, technology and design to provide solutions for prevention and non-drug treatments focused on simplicity, comfort and the well-being of users.

In 2014, VISIOMED GROUP announced the launch of its “BewellConnect®” line of healthcare products, becoming the first medical electronics laboratory to penetrate the very high-potential market of the Internet of Things (IoT). Based in Paris, VISIOMED GROUP relies on a team of 105 employees, including sales forces dedicated to commercialization in pharmacies (OTC), among health professionals (hospitals, clinics and retirement homes), and since late 2010, in mass distribution. In 2014, the Group made turnover of more than €13 million. VISIOMED GROUP was described as an “Innovative Company” by Bpifrance.

VISIOMED GROUP was ranked 2nd nationally at the 2014 edition of the Deloitte In Extensio Technology Fast 50, and 2nd in Europe in the Health/Biotech/Pharma sector of the Deloitte Technology Fast 500. In 2016, VISIOMED GROUP won the ScaleUp Awards organized by KPMG and CroissancePlus, and was ranked 1st company in the Health sector in the FW500 ranking (FrenchWeb).
